## Proposed Mount Isa City Council Local Heritage Register

The following is a list of the 23 places proposed to be entered onto the Mount Isa Local Heritage Register.

Please click the Place Name and refer to individual Place Cards for more information.

Local Place IN. No.	Place Name	On Queensland State Heritage Register(QHR)*	Address / Location	Title Details	Reason(s) / Criteria Met**
1	Bower Bird Battery	Yes. QHR Place ID. No. 601863	Via Calton Hills Station, close to Lake Julius, Mount Isa	8TG35	A, B, C, D
2	Camooweal Cemetery	No.	Cemetery Road, Camooweal	11WO9	A, C, E, G
3	Casa Grande	Yes. QHR Place No. 601094	Nettle Street, Mount Isa	7SP128450	A, D, E, G, H
4	City Lookout	No.	Hilary Street, Mount Isa	1CP854048, 29USL47890, 29CP85404	E, G
5	Civic Centre Complex	No.	23-33 West Street, Mount Isa	14RD273	A, D, G
6	Community Hall, Camooweal	Yes. QHR Place ID. No. 600740	Barkly Street, Camooweal	401C3931	A, D, E, G,
7	Former Underground Hospital, Mount Isa	Yes. QHR Place ID. No. 601102	Joan Street, Mount Isa	7M7587	A, B, C, D
8	Frank Ashton Underground Museum	No.	Shackleton Street, Mount Isa	2M758220	F, G
9	Freckelton's Store	Yes. QHR Place ID. No. 600739	Barkly Street, Camooweal	301c3931	A, D, E, G
10	Hodgekinson's Marked Tree	Yes. QHR Place ID. No. 600741	Rockland Station, North of Camooweal	12CP843242	A, H
11 <b>Intentionally Removed</b>	Isa Street Bridge	No.	Isa Street, Mount isa	56RD104	A, G
12	John Campbell Miles Monument	No.	Corner of Miles and Rodeo Drive, Mount Isa	Road Reserve	A, E, G, H
13	Kruttschnitt Park	No.	Corner of Fourth Avenue and Isa Street, Mount Isa	41USL47855, 2MPH21956, 1MPH21956	A, B, D, G
14	Lake Moondarra	No.	Moondarra Drive, Mount Isa	AAP20231, ASP128453, 90SP128452	A, B, E, G
15	Mount Isa Central School	No.	49 Miles Street, Mount Isa	1SP159001	A, B, D
16	Mount Isa Mine Early Infrastructure	Yes. QHR Place ID. No.	Mount Isa Mine Lease, Mount Isa	7SP128450	A, B, C, G
17	Mount Isa Sunset Memorial Cemetery	No.	Sunset Drive, Mount Isa	95SP134707	A, C, G
18	Mount Isa Telephone Exchange	No.	Isa Street, Mount Isa	35RP719363, 45RP727010	A, D
19	St James' Anglican Church	No.	Railway Avenue, Mount Isa	1SP225558	A, E, G
20	St Joseph's Church and School (former)	No.	2-10 Church Street, Mount Isa	1MPH7978	A, E, G
21	Tent House	Yes. QHR Place ID. No. 600742	Camooweal Street	7M7587	A, B, D, F, G
22	The Old Cemetery	No.	Off Activity Road, Mount Isa	48RD148	A, C, E
23	Tree of Knowledge	Yes. QHR Place ID. No. 600738	Barkly Highway, Camooweal	21SP135293	A, G

\*For more information on local heritage places that are on the Queensland State Heritage Register, please visit the Department of Natural Resources and Mines website at <https://www.qld.gov.au/environment/land/heritage/register>

\*\*Please see criteria listed on page 2.

The reason(s) for the proposed entry of each place is that they have been assessed as meeting one or more the following criteria:

- A. The place is important in demonstrating the evolution or pattern in the region's history.

- B. The place demonstrates rare, uncommon or endangered aspects of the region's cultural heritage.
- C. The place has potential to yield information that will contribute to an understanding of the region's history.
- D. The place is important in demonstrating the principal characteristics of a particular class of cultural places for the region.
- E. The place is important to the region because of its aesthetic significance.
- F. The place is most important in demonstrating a high degree of creative or technical achievement at a particular period for the region.
- G. The place has a strong or special association with a particular community or cultural group for social, cultural or spiritual reasons important to the region.
- H. The place has a special association with the life or work of a particular person, group or organisations of importance in the region's history.

Historical Context	<p>European settlers moved into the Camooweal area in the late 1860s after the initial exploration by William Landsborough. On 1 October 1883 residents of the Barkly Tablelands sent a petition to the Hon. Minister for Lands in Brisbane requesting 'that he reserved a portion of land for a township on Lake Frances situated about six miles below Rockland Station at the junction of the main road down the Georgina River and the road turning off into the Northern Territory of South Australia'. In December 1883 a reserve of four square miles was set aside and gazetted as township. This reserve was relocated to the present location and regazetted in August 1884.</p> <p>By the early 1890s Camooweal had developed into a town servicing the pastoral industry of the area. There was a customs post, telegraph and post facilities, courthouse, police station and school as well as two hotels and a number of services and stores.</p> <p>It is unclear when the cemetery was established. The earliest date found on a headstone is 1908 but death notices in The Queenslander date back to 1887, potentially dating the cemetery from this time.</p>			
Physical Description	<p>Camooweal Cemetery is located to the north-east of the town adjacent to the Camooweal Airport and comprises 2.15 ha of fenced land. Access is via Cemetery Road off the Barkly Highway at the eastern end of town. The terrain is flat with stony red ground partly covered with native grass and small scrubs. Along the northern boundary are a variety of trees and shrubs.</p> <p>Some graves are marked with headstones, but the majority are identified only by metal grave markers attached to a concrete base. A number of graves are surrounded with metal fencing and railings and there is also an iron bedstead over one grave. Several gravesites are covered by concrete slab. The entrance is denoted by a steel gate and lintel with the words 'CEMETERY' affixed.</p>

				7714172
Place Category	Monuments and Memorials			
Historical Context	Shire Chairman George McCoy opened the John Campbell Miles Lookout to the public on 14 May 1967. The lookout offers impressive views over the industrial landscape of Mount Isa Mines, the dramatic natural landscape of the Selwyn Range and over the city itself. The signpost pointing to cities all over the world visually locates Mount Isa in context to the world. The City Lookout quickly became a tourist attraction and has featured widely in promotions and publications of the city.			
Physical Description	The lookout and signpost are located on top of a hill in the centre of town. Access is via a winding road that ends at a carpark area on a lower level and a walkway to the top level via a ramp. Adjacent to the carpark is a picnic area with tables and benches. Also located here is a large watertank. The top level consists of a concreted platform surrounded by metal fencing. There is also a covered bench seat. Adjacent is a large transmission tower and a small concrete building. The main feature of the top level is the large white signpost located just off the centre of the platform. The signpost consists of a white pole with rectangular white markers with black lettering pointing in different directions. Each marker names a city and the distance and direction from the lookout. Mounted on top of the pole is a semi-circular sign displaying positioning details of Mount Isa.

Criteria	Description						
<b>E</b>	<i>The place is important to the region because of its aesthetic significance</i>						
Statement	The lookout and the signpost are significant as a Mount Isa landmark. The white structure on a hill top situated in the centre of town displays aesthetic value that has been recognised as a tourist destination since its establishment. The setting includes impressive views over the industrial landscape of Mount Isa Mines and the dramatic natural landscape of the Selwyn Range as well as over the city itself and evokes a strong sense of place of a mining town in Outback Queensland.						
<b>G</b>	<i>The place has a strong or special association with a particular community or cultural group for social, cultural or spiritual reasons important to the region.</i>						
Statement	The lookout and signpost have social value to the Mount Isa community and its visitors, as a popular place to enjoy the views over the mine, the city and the Selwyn Range.

Title Details /(GPS)	14RD273	Easting	N/A	Northing
Place Category	Recreation and Entertainment			
Historical Context	<p>In the 1970s business in Mount Isa was booming and the population was steadily growing. The royal visit of Queen Elizabeth and Prince Phillip in 1970 prompted Mount Isa Mines to donate \$100,000 towards the establishment of the Civic Centre Complex to include a multipurpose function centre and public library surrounded by a public garden space. The business community supported the project with \$1,000 donations. Mount Isa City Council sponsored an architect's competition for the design and planning of the complex, inviting six prominent firms to submit their plans. The winning entry was from Lund, Hutton, Newell and Paulsen, a Brisbane firm, and the building was designed by John M. Morton, who also designed the heritage listed Kinkabool building at Surfers Paradise for Lund, Hutton, Newell and Paulsen. The contract architect for the project was Shane V Ryan.</p> <p>The library opened on 26 April 1974 and replaced the first public library building donated by Mount Isa Mines in 1958. Queensland Premier, Hon. Joh Bjelke-Petersen, officially opened the Civic Centre as a venue for concerts, theatre, conventions, private functions and art exhibitions on 9 November of the same year. Members of Mount Isa's multi-cultural community attended the ceremony in their national costumes, displaying flags of twenty-seven nations. The Civic Centre includes artwork by Mount Isa Mines resident artist Val Pinsker, consisting of two hand-beaten copper wall murals. The building cost for the entire complex, which was one of the largest of its kind in Outback Queensland, amounted to \$2.6 million. Mount Isa had shed its image of a struggling mining town and developed into the business, service and administrative centre for the region, a fact that was recognised with the town receiving city status in 1968. The financial commitment by the community towards the Civic Centre Complex and the modern design, by a prominent Brisbane architectural firm, of the complex itself are a tangible expression of the confidence in the growth of the city in the 1970s.</p> <p>The complex is situated in the centre of Mount Isa bordering on to the Leichhardt River, West Street and Marian Street, as well as the Mount Isa City Council administration building. The complex consists of the Mount Isa Memorial Civic Centre, an amphitheatre, library, carpark and surrounding park and gardens. The buildings display clear straight geometrical lines. Materials used are predominantly concrete, glass and copper. The facades show exposed aggregate concrete panels, a feature mainly used in the 1970s.</p>			

Physical Description	<p>The complex is situated in the centre of Mount Isa bordering on to the Leichhardt River, West Street and Marian Street, as well as the Mount Isa City Council administration building. The complex consists of the Mount Isa Memorial Civic Centre, an amphitheatre, library, carpark and surrounding park and gardens. The buildings display clear straight geometrical lines. Materials used are predominantly concrete, glass and copper. The facades show exposed aggregate concrete panels, a feature mainly used in the 1970s.</p> <p><b>Library:</b> The Library is a rectangular single storey building with three large V-shaped elements with front and end sides facing West Street and carpark respectively which form the main roof. These elements are constructed of glass and copper. Access is via the main entrance from West Street, via a foyer with two sets of glass doors. The word LIBRARY is displayed next to the doors. The part of the foyer facing West Street shows an integrated shelter with bench seat. Towards the northern corner is a row of three windows, framed by a concrete casement. The northern and southern walls each show ten small windows all covered by metal hoods. The western wall facing the carpark has a loading dock with roller door on the northern corner.</p> <p><b>Civic Centre:</b> The Civic Centre is a rectangular two-storey building with copper featured in the roof skirting, doors and also in the interior artwork. Local aggregate and also gravel from the Leichhardt River were used in the concrete elements of the building, including external facades. The main entrance is on the south-eastern side featuring large double doors made from copper. Above the doors is the inscription THE MOUNT ISA MEMORIAL CIVIC CENTRE. Adjacent to the right side of the door is a lower-level terrace covered by an awning and separated from the driveway by a concrete wall. Access is via a set of stairs on the right. Some of the walls in this area are tiled and feature stepped building elements. There is also another entry into the building via metal double doors. Located on the far right of the building is another small door. On the northern side of the building is a separately built amphitheatre with stepped concrete seating facing the stage which is locked by a roller door.</p> <p>The area underneath the seating is accessed through a metal door facing the carpark. The western side of the Civic Centre also has a terrace covered by an awning. The upper level on</p>

Heritage Significance							
A	B	C	D	E	F	G	H
Criteria	Description						
A	The place is important in demonstrating the evolution or pattern of the region's history.						
Statement	The Civic Centre Complex is important in providing physical evidence for an historically important phase of prosperity in Mount Isa in the 1970s.						
D	The place is important in demonstrating the principal characteristics of a particular class of cultural places important to the region.						
Statement	The Civic Centre Complex demonstrates characteristics of a cultural complex in the 1970s in regards to its design, materials used and multi-functional concept.						
G	The place has a strong or special association with a particular community or cultural group for social, cultural or spiritual reasons important to the region.						
Statement	The Civic Centre Complex has important associations with the community of Mount Isa and the surrounding region as a venue for social interaction and entertainment as well as for providing educational opportunities.						

the eastern side consists of covered veranda areas, partly protected by glass. Some walls are tiled, similar to the lower level. The western side facing the mine also has covered verandas on the upper level. A broad roof skirting, consisting of flat copper sheeting, runs along the whole building.

**Park and Gardens:**

In the front of the complex along West Street are two mature Ghost Gum Trees in a grassed area, which is separated from the road by a low hedge. Along the south side of Civic Centre runs a footpath through a mature garden setting to the back of the building.

A U-shaped driveway leads from West Street to the entrance door and past the library back onto West Street. A large carpark is located to the north of the complex and bordering onto the river bank. There is a small park area with mature trees in between the carpark and West Street. There are also a number of trees around the library and the amphitheatre.

# Frank Aston Underground Museum - ID:8

AHC Category	Archaeological	Historic	Indigenous	Landscape
	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Other Names	Frank Aston Hill			
Address/Location	Shackleton St		Mount Isa	
Title Details / (GPS)	2M758220	Easting	N/A	Northing
Place Category	Recreation and Entertainment			
Historical Context	<p>The Frank Aston Underground Museum was established by Rotary under the leadership of Frank Aston, a Mount Isa businessman and collector of local historic artefacts, with the mission to preserve the history of the region. The museum was officially opened by Sir James Foots, Mount Isa Mines Chairman of the Board of Directors, on 19 July 1976. The company donated \$10,000 towards the project. A system of tunnels was drilled into a hill in the centre of town to create a display area for pastoral and mining equipment as well as other historic artefacts donated by the public. Mount Isa's first watertank on top of the hill was converted into a two-storey display area containing an Aboriginal display of the Lardil people on the lower level and a social history exhibition on the upper level. For twenty years the museum was managed and staffed by the Mount Isa Rotary Club until the museum became part of the Queensland Museum (QM) and was incorporated into the Museum of North Western Queensland, branch of QM, in 1996. After the closure of the Museum of North Western Queensland a number of collection items were used in the establishment of the Isa Experience at the Outback at Isa centre. In following years parts of the Underground Museum were used by Arilla Paper, a paper-making enterprise. Some redevelopment of the site was undertaken in 2008.</p>			
Physical Description	<p>The Frank Aston Underground Museum is located in the centre of town and borders on to Shackleton, Marian and Gray Streets. The site encompasses a small hill with a watertank situated on top and a flat area at the foot of the hill. There are pathways leading through the display area which contains large pastoral and mining equipment. Located on the flat in the north western part are number of buildings, some constructed of concrete blocks. There is also a rectangular building on metal stumps resembling a tent house next to an entrance featuring metal gates. Located on the flat in the south western part is an entrance gate showing two wall segments, featuring rendered concrete pillars and panels, either side of some metal gates. Behind the gates is the entrance to the tunnel section of the museum. Further south is a small concrete toilet block. The site is surrounded by a security mesh fence. There are two carparks, located on the flat section in either entrance area.</p>

Historical Context	<p>With the discovery of the Mount Isa field in 1923 miners working on the leases set up camps on the western side of the Leichhardt River. The new settlement grew quickly and by 1924 the town, with a population of 350, comprised two stores, a bakery, three boarding houses, a hall, ambulance, provisional school and two picture theatres. People were either living in tents or bough sheds. When Mount Isa was surveyed later that year it was decided to move the township to the other side of the river to allow for expansion of the mining activities and the construction of the railway. Businesses were established in the surveyed town, but residents were reluctant to move their homes. With the arrival of the railway in 1929 the population increased to 3,000 and camps were set up on either side of the river, forming a distinct 'Townside' and 'Mineside'. When the Leichhardt River flooded, people were left stranded on either side.</p> <p>In 1931, the Cloncurry Shire Council announced plans for a bridge linking the town and the mines. The local Chamber of Commerce provided a census of motor vehicles travelling between town and mine.</p> <p>The Isa Street Bridge was officially opened 25 November 1932. Until the opening of the Sir James Foots Bridge in 1967 Isa Street Bridge was the only bridge in town providing a link between the Mines and the town. It appears that the bridge has been duplicated more recently to provide separated pedestrian crossing, however the date of this undertaking is unknown.</p>			
Physical Description	<p>Isa Street Bridge is located in the centre of Mount Isa spanning the Leichhardt River. There is a two lane roadway with kerb at each side as well as a footpath consisting of two stepped concrete strips on the northern side. This section shows a metal railing. On both ends of the bridge are two square concrete pillars, one on each side. The bridge consists of a low level concrete deck constructed on concrete piers. There are two types of piers positioned side by side; one element consists of a two legged brace shape, supporting the earlier road bridge and the other T-shaped piers supporting the more recent pedestrian footpath.</p>

Historical Context	<p>John Campbell Miles was born on 5 May 1883 in Melbourne. He started work with a bootmaker aged twelve and later worked as a farm-hand. In 1907 he worked underground at Broken Hills before riding his bicycle 2494km to the Oaks alluvial goldfield in North Queensland. On finding the ground fully pegged he prospected on the Etheridge field, again with no luck. Over the next decade he worked on the railway, on stations, cut sugar-cane and went fossicking. On his way to the Northern Territory in February 1923 Miles noticed mineralised outcrops while camping at the Leichhardt River, 9.6km below Lagoon Creek. Using a shoeing hammer he collected some samples which were identified by the Government Assayer in Cloncurry as lead carbonate containing 49-73 % lead with rich silver contents. Miles, together with Bill Simpson, pegged three areas around the original find site which became known as Black Star and Racecourse leases. Six months later the field was named Mount Isa by which time the options over most of the field, including Miles' and Simpson's leases, had passed onto William Corbould and Douglas MacGilvray.</p> <p>John Campbell Miles, who is regarded as the founder of Mount Isa, died in Melbourne on 4 December 1965. His ashes were buried beneath the John Campbell Miles Memorial Clock Tower in Miles Street in August 1968. The memorial was conceived and constructed by the Mount Isa Chamber of Commerce at a cost of \$13,000 to 'honour the man who discovered Mount Isa'.</p> <p>In 2007 the memorial monument was refurbished, with the four town clock faces, originally located in the top part of the structure, replaced with stained glass panels depicting aspects of Mount Isa's heritage and culture. In 2011 a petition signed by 1,238 residents of Mount Isa requested the reinstallation of John Campbell Miles Memorial Clock to the monument.</p>			
Physical Description	<p>The memorial is located in Miles Street in the centre of town on a concrete platform on the median strip framed by railing. The memorial monument consists of four tall upright beams with rectangular profile which are joined near the top. Located in the centre are three cylindrical elements consisting of a number of rectangular plates showing abstract multi-coloured reliefs. The monument is fitted with spotlights to illuminate the middle elements. On top of the monument is a cubic element with four stained glass panels depicting mining, Aboriginal and rodeo scenes as well as the Mount Isa City Council logo. In front of the structure itself is a large boulder and some interpretive signage.</p>

Place Category	Recreation and Entertainment			
Historical Context	<p>On request from the community, Mount Isa Mines (MIM) supplied land, financial and administrative assistance 'to provide healthy recreational facilities for all members of the community'. A grassed oval was established by mostly volunteer work by late 1935, followed by Mount Isa's first cricket pitch and bowling green in 1937. MIM also contributed £800 for 'buildings, fences and conveniences'. The interims Board of Trustees of the Mines Recreation Area, established in 1935, was replaced by an official seven member Board in 1936 to oversee the running of Mines Recreation Area and liaise with sporting clubs and organisations using the facilities. A small rental fee was charged to support maintenance costs with schools being exempt.</p> <p>The traditional Christmas Tree was initiated in 1934 by Julius Kruttchnitt, MIM Director from 1930-67, and provided every child to the age of ten with a gift. This annual event was first held at the Band Rotunda on Mineside and later the Christmas Tree celebrations were relocated to Kruttchnitt Park.</p> <p>On New Year's Eve 1949 the Mount Isa Memorial Pool was officially opened, 'dedicated to the memory of those employees of the company and citizens of Mount Isa who gave their lives in the defence of their country'. The idea for an Olympic size swimming pool within the Mines Recreation Area had been contemplated by MIM since the late 1930s and now the community received 'an amenity that is not enjoyed by people in many places throughout Australia'. In 1953 the Mines Recreation Area, now incorporating the swimming pool, sports oval, tennis courts and bowling green, was renamed Kruttchnitt Park in honour of Julius Kruttchnitt, who had supported sporting and recreational facilities in the city.</p>			
Physical Description	<p>Kruttchnitt Park is located in Parkside and borders onto Isa Street, Fourth Avenue and Church Street. The complex includes the aquatic centre in the northeast, the sports oval in the southeast, a new playground in the southwest and a skate park in the northwest. The entrance from Isa Street features two large square columns with stepped top and metal ornaments. Between the columns spans a wrought iron rounded panel displaying KRUTTSCHNITT PARK in ornamental lettering.</p>

Criteria	Description						
<b>A</b>	<i>The place is important in demonstrating the evolution or pattern of the region's history.</i>						
Statement	Kruttchnitt Park is important in demonstrating the integral role of Mount Isa Mines in the establishment of community facilities in a mining town, establishing a clear relationship between the mine and town.						
<b>B</b>	<i>The place demonstrates rare, uncommon or endangered aspects of the region's cultural heritage.</i>						
Statement	Kruttchnitt Park is significant as it demonstrates the role of Mount Isa Mines in providing healthy recreational facilities for all members of the community from the 1930s.						
<b>D</b>	<i>The place is important in demonstrating the principal characteristics of a particular class of cultural places important to the region.</i>						
Statement	Kruttchnitt Park is significant as it demonstrates the principal characteristics of a community sporting oval and related sporting infrastructure.						
<b>G</b>	<i>The place has a strong or special association with a particular community or cultural group for social, cultural or spiritual reasons important to the region.</i>						
Statement	Kruttchnitt Park has a strong association with the community of Mount Isa, who called for assistance from Mount Isa Mines to build the facilities in the early days of the town. Since its establishment Kruttchnitt Park has been used continuously for sporting events and the park has also been the venue for social gatherings like the Christmas Tree celebrations. The pool is dedicated to the memory of citizens and employees of Mount Isa who lost their lives in the war.

Place Category	Utilities - Water supply			
Historical Context	<p>Increasing industrial development and the growing population of Mount Isa after World War II led to serious problems in regards to securing a reliable source for the supply of water. In an attempt to resolve this issue Mount Isa Mines (MIM) embarked on 'an ambitious project' to dam the Leichhardt River sixteen kilometres north of Mount Isa at the junction with Spring Creek. Construction of the dam, later named 'Lake Moondarra' by local school children, was finished in 1958 after some delays due to seasonal rains in December 1956 when flood waters severely damaged the partially completed wall. The project, which had been started in 1956 by Utah Construction, an American company, was completed by Australian firm Thiess Brothers at a cost of \$2.4 million, making it the largest non-Government funded water scheme in Australia at the time. On completion Lake Moondarra had a storage capacity of 107 gegalitres, held back by a 26.5 metre concrete-faced wall.</p> <p>The potential of the lake as a recreational facility was recognised from an early stage and MIM established a Board of Management to oversee the development of a Dam Recreation Area excised by the company. Several boating clubs were established with the Leichhardt Boating Association being in charge of inspection and registration of boats from 1959. The Mount Isa Yacht Club followed in 1960 with large yachts and catamarans, some built in local backyards, being popular. Waterskiing was another favourite sport, represented by the Mount Isa Water Ski Club, which was also formed in early 1960. MIM and Thiess Brothers created a sandy beach at Transport Bay by late 1960, complete with buoyed off swimming area and patrolled by the Life-Saving Club. The Dam Recreational Area was declared a wildlife sanctuary and supervised by a caretaker. In 1968, Clear Water Lagoon, located in the southern end of the lake, was partitioned off from Lake Moondarra as a protected reservoir to ensure water quality standards during the wet season through a natural filtration process.</p>			
Physical Description	<p>Lake Moondarra is located sixteen kilometres north of the city on the Leichhardt River and access is via a sealed road. The area consists of rugged bushland with rocky hills and sparse vegetation.</p> <p><b>Dam wall</b> In the northeast is the concrete dam wall, measuring approximately 280m across at the top and 26.5m in height, with the spillway adjoining to the north. There is a walkway across the top of the wall.</p> <p><b>Lookout</b> The Lookout is located near the southern end of the dam wall and provides 360 degree views over the area. There is a small round shelter on a hill with access via a set of stairs as well as some interpretative signage.</p> <p><b>Recreational areas</b> There are several recreational areas on the shore line as well as near the bottom of the dam wall.</p> <p>Warina Park is situated close to the foot of the dam wall and consists of a grassed area with a number of Ghost Gums and other, mostly native, vegetation. There is also a toilet block, BBQs and a children's playground. Transport Bay recreational area is located in the east on the shore of the lake and provides a grassed area with some Paperbark trees and a single, large palm tree as well as concrete walkways, BBQ shelters and a rectangular concrete building with corrugated iron roof and annex. A sign on the roof reads THE NORTH WEST CANOE CLUB. The northern part of the building incorporates a toilet block. A small distance to the southwest from Transport Bay is a boat ramp and recreational area with toilet facilities and BBQ area at Blackrock. There are further picnic areas and shelters located along the shore. Close to the entrance to the Lake Moondarra recreational area is the Wallaby Walk, a walking track.</p>

<b>Criteria</b>	<b>Description</b>
<b>A</b>	<i>The place is important in demonstrating the evolution or pattern of the region's history.</i>
<b>Statement</b>	Lake Moondarra is important in demonstrating the importance of the mining industry for the development of Mount Isa, incorporating a need for a reliable water supply.
<b>B</b>	<i>The place demonstrates rare, uncommon or endangered aspects of the region's cultural heritage.</i>
<b>Statement</b>	Lake Moondarra is significant in providing tangible historical evidence of Mount Isa Mines' surrogate municipal role in providing infrastructure to the community by constructing and financing the water supply for the town at substantial cost without government funds.
<b>E</b>	<i>The place is important to the region because of its aesthetic significance</i>
<b>Statement</b>	Lake Moondarra has aesthetic significance in providing spectacular views over the lake and the Leichhardt River valley. The place displays evocative qualities generated by the strong visual impact through the juxtaposition of the rugged and arid landscape and the expanse of the lake.
<b>G</b>	<i>The place has a strong or special association with a particular community or cultural group for social, cultural or spiritual reasons important to the region.</i>
<b>Statement</b>	Lake Moondarra has a strong association with the Mount Isa community demonstrated by the continuous recreational use since its construction.

Title Details / (GPS)	1SP159001	Easting	N/A	Northing
Place Category	Education, Research, Scientific Facility			
Historical Context	<p>In mid 1924, the developing township of Mount Isa included eighteen school-aged children and on request by the parents the Education Department approved a provisional school on condition that the parents built the school without cost to the department. The building, constructed by local blacksmith Charlie Leonard and opened on 28 July 1924, was 'a structure of gidgee uprights with an iron roof, hessian walls and a ground floor' as described by the first teacher John Skene. Requests by the Chamber of Commerce in late 1924 for a more permanent building on the newly surveyed school reserve site were dismissed until 'the permanency of the place (Mount Isa) is established' to warrant the expenditure. In January 1926 the first permanent school building, the Town School, was opened on the school reserve, constructed on high blocks allowing for a shaded play area underneath and providing room for forty pupils. By 1929 the school was catering for 109 pupils and prompted the Department of Education to import a wing from the school from the abandoned mining town of Kurindala. In 1930, a married teacher's residence was constructed at one corner of the school grounds. By the early 1930s, the school facilities proved inadequate, with 300 students enrolled in 1931. Illustrating the significance of the mine, one third of the pupils lived on Mineside. To ease overcrowding the Education Department build a new state school on Mineside, which opened in May 1932. In 1965 Town School was renamed Mount Isa State School and then renamed Mount Isa Central State School a year later.</p> <p>The Mount Isa Central State School was expanded as the student population grew and a building for the District Office was established in the school grounds in 1993.</p>			
Physical Description	<p>Mount Isa Central State School is a P-7 school located on a city block, bordering on to Miles, West, May and Grace Streets. The fenced complex consists of a number of school buildings of varying sizes and construction periods, school teacher's residence, administration building, sports and playgrounds. There are a number of mature trees on the site, particularly in the middle section of the northern area, as well as along Miles Street in the southern section of the site and in between the buildings. The majority of buildings are located in the southern part, mainly along Miles Street. The main school entrance is also located there. These buildings are generally timber structures with corrugated iron gable roof and feature side verandas. The Administration and staff room, complete with their verandas are understood to have been re-located from Kurindala in 1924. Separated from the main school buildings by a sports ground is the Teacher's residence on the north-eastern corner. It consists of a single storey timber structure on high stumps with hipped corrugated iron roof.</p>

Historical Context	<p>The Mount Isa Sunset Memorial Cemetery is the second cemetery for Mount Isa and burials started from the early 1930s. The cemetery includes a lawn section, monumental section and a columbarium wall for cremated remains and commemorative plaques. From the beginning of the town in the 1920s people from all over the world were attracted to the region by the mine, creating a multicultural community in Mount Isa. The cemetery bears witness to this fact with many ethnic groups being represented. The memorial entrance gates were officially unveiled by the Chairman of the Mount Isa Shire Council, CR. G.E.Mc Coy on 25TH APRIL 1966.</p>			
Physical Description	<p>The cemetery is located in the suburb of Sunset at the end of Sunset Drive and is surrounded by a perimeter fence. Access is through an entrance from the carpark via a double gate featuring two large square masonry columns with stepped top. Between the columns spans an arched panel displaying the lettering SUNSET LAWN CEMETERY. There is a plaque on the right column with the inscription MEMORIAL ENTRANCE, DEDICATED BY MOUNT ISA SUB BRANCH RETURNED SERVICES LEAGUE IN MEMORY OF FALLEN COMRADES "LEST WE FORGET". On either side of the entrance are raised garden beds. A pathway in the lawn section leads through an avenue of mature trees past a columbarium and into the conventional section in the northern part of the cemetery. Monumental graves generally include headstones, concrete surrounds and railings.</p>

Historical Context	<p>Between 1962 and 1964 Mount Isa's population grew from 14,000 to 15,000, making the town the fastest growing in Queensland. New stores, small manufacturing and service businesses and factories were opening up and building approvals reached a record high. In April 1964 the Department of Works called for tenders to build a new automatic telephone exchange and trunk line building in Isa Street to cater for the ever increasing number of telephone subscribers. K.D.Morris and Sons Pty Ltd were awarded the contract and work started in July 1964. The building was designed to consist of two storeys, one on ground level and a second on a lower level taking advantage of the sloped site, constructed of concrete blocks with air-conditioning and a landscaped garden along the street front. The building was handed over on the 6 April 1965 at a cost of \$141,655. In May 1966 the installation of the equipment for the new exchange started under the supervision of E.G.P. Watson, with up to thirty technicians involved in the project. When the new exchange was switched over on Sunday 26 November 1967, it provided 2,000 lines and the total cost had amounted to \$600,000. The manual telephone trunk exchange was brought into service in early 1968. The official opening ceremony was held 13 December 1967, performed by Robert Cummin Katter, Federal Member for Kennedy.</p>			
Physical Description	<p>The Mount Isa Telephone Exchange is located on the corner of Isa and Camooweal Streets in the centre of the city on a sloped site. The rectangular concrete block building has a low pitched 'flat' roof. Access is via an entrance from Isa Street which consists of a tall glass and timber door. This side of the building has a portico featuring eight rectangular pillars. The side facing Camooweal Street has several windows on the upper level and doors and loading bays on the lower level. Adjacent to the building in a fenced-off area is a large transmission tower and a carpark.</p>

Title Details / (GPS)	1SP225558	Easting	N/A	Northing N/A
Place Category	Religion/Worship			
Historical Context	<p>The first St James' Anglican Church was located in Miles Street opposite the Central State School and consisted of a building relocated from Selwyn in 1930. Previously church services in Mount Isa had been provided by the Brotherhood of St. Barnabas, the Bush Brothers, from Cloncurry. In 1945 the church building was moved to a more central position, a newly acquired site in Railway Avenue, formerly known as Station Street. In 1950s plans for a new church building were prepared requiring the relocation of the former Selwyn church to Soldiers Hill where it remained as St Oswald's for several years before being sold. The foundation stone for the new St. James Church was laid by Bishop Shevill in May 1957 who also dedicated the building on its completion 8 December 1957. Special features of the church are a bell tower shaped like a mine headframe and stones from the surrounding hills used in some of the walls. The collection of stained glass windows was initiated by Fr. John Emerson in the late 1980s.</p>			
Physical Description	<p>St James' Anglican Church is located on the corner of Isa Street and Railway Avenue on a fenced block. On the site are two structures, the church facing Railway Avenue and an ancillary building facing Isa Street.</p> <p>Church: The church consists of a rectangular building with low pitched corrugated iron roof and a small annex on both, the eastern and western, sides. The annex facing Railway Avenue is slightly lower than the main building and displays a feature wall consisting of vertically mounted stone slabs. On the right side is a relief in the shape of a cross consisting of smaller horizontally arranged stone slabs. On the lower left side is the rectangular foundation stone. The southern wall of the annex features a large stained glass window. Access into the annex is via a large timber framed glass door on the northern side. This area is covered by an awning resulting from the extension of the roof which is resting on a wall featuring small horizontally placed stone slabs. The southern side of the building shows a number of stained glass windows and louvers on a low base featuring vertically mounted stone slabs. To the right there is a panel spanning the whole height displaying the same feature. The northern wall of the building is covered by an awning supported by posts. Above is a row of clerestory windows. There are four French doors leading into the building on this side as well as one solid door leading into the rear annex. Next to the entrance is the free-standing bell tower. The structure resembles a mining headframe and consists of three rectangular posts, one in the shape of a cross, and one stone pillar featuring stone slates. There is a platform in the upper part and the structure is covered by a small roof. The bell is fixed to a metal rod.</p> <p>Ancillary building: This building consists of a rectangular structure with low pitched corrugated iron roof. Access is via a large glass door facing a covered landing. Next to the door are a number of tall windows. Above the door and windows is a row of clerestory windows. The front facing Isa Street shows two vents in the gable as well as the inscription SAINT JAMES. On the opposite side is a tall chimney. On the western side of the building are several trees.</p>

**Historical Context**

The first Catholic Church building in Mount Isa was a relocated wooden building constructed in 1916 in Duchess. The building was re-established in Camooweal Street on Townside as the Good Shepherd Church for the newly created Catholic Parish of Mount Isa. The Church and the added Presbytery, which was built as a Housing Commission home, were blessed and opened on 13 July 1930 by Bishop McGuire. Many of the parishioners walked long distances to attend Mass and it was decided to sublease a piece of land from Mount Isa Mines on Mineside to have a more centrally located site for a convent for the Sisters of Saint Joseph as well as for a school. The former Marshall's Hall, a picture theatre, was moved from Kuridala and became Saint Joseph's Church/School and an office and residence building from Selwyn was transformed into the convent. The Sisters of St. Joseph started teaching from 1932. Besides being used as church and school the building also served as a recreational and dance hall for the community. During World War II the buildings came under the command of the Australian Army and were used as storage. During this time all services were provided from the Church at Camooweal Street. Mount Isa's growing population created the need for a larger school and in 1950 the foundation stone of a cruciform classroom block at St. Joseph's was laid. For the following five years the former combined school/church building was exclusively used as a church before its demolition to make room for the new church building, constructed in Spanish Colonial style for \$80,000, which was opened on 19 May 1957. At the same time a school hall, a stone wall along Death Adder Gully and a playground were built. In 1960 the Sisters of St. Joseph received a new convent on the former tennis court with the old Convent becoming St. Joseph's Presbytery which was later replaced by a cottage from King's Cross on Mineside.

In 1985 the former San Jose College in Happy Valley became the new premises for the St. Joseph's Primary School. Today the former St. Joseph's School is used as St. Joseph's Training Centre by Xstrata.

The former church building has been occupied by Mount Isa Mines as an interpretation and visitors centre housing a mine and mineral display for a number of years. In 2011 the building underwent refurbishment by Xstrata.

**Physical Description**

The former church is located in Church Street east of the former school. The rectangular rendered concrete building is designed in Spanish Colonial style featuring a tiled roof. Each side displays an arcade which is accessed via a few steps. The front façade is designed symmetrically with a rectangular stepped relief element in the centre on the upper part above the main entrance door. To the left and right are two tall narrow arched windows. This feature is repeated on two openings on the front side of the side arcades. The lower part shows an arcade as well which spans the whole front of the building featuring five arches with access via a few steps and a ramp on the right. There are three entrance doors in the front of the building, a larger double-door in the middle and a single door either side. In the front of the church are two mature trees.

**School:**

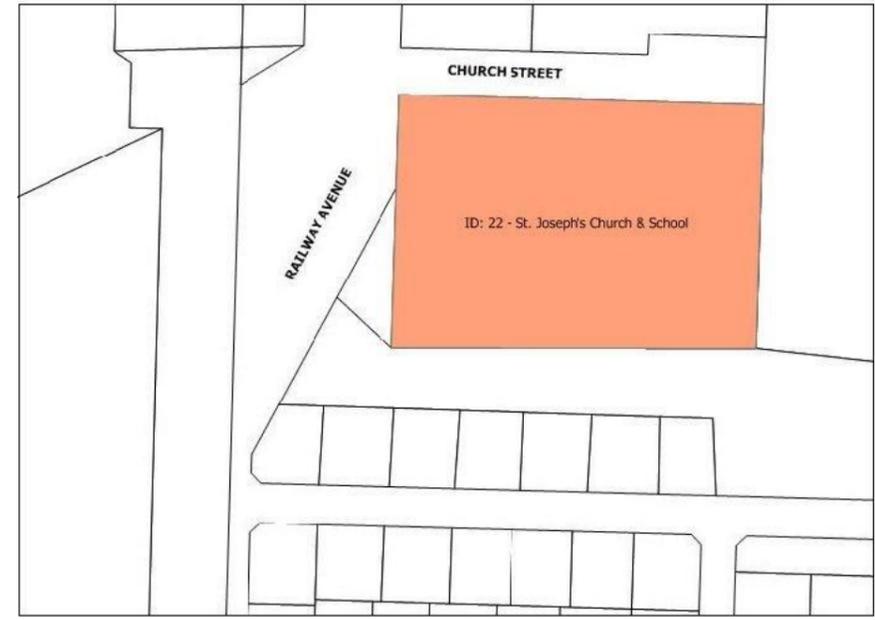

The former school is located on a fenced block on the corner of Church Street and Railway Avenue. The cruciform building consists of a timber structure on low stumps with a corrugated iron roof. In the centre of the complex is a square element with pyramid roof that rises above the rest of the building. A band of small windows runs around this structure. A veranda wraps around most of the building. The front façade facing Railway Avenue consists of rendered concrete and displays a stepped parapet that follows the form of the gable in the middle part. It is decorated with a relief showing an arched pediment with sunrise motif which is resting on stylised columns standing on a base protruding from the wall. On either side of this feature are two casement windows covered by an awning of corrugated iron. The building features several French doors leading onto the veranda which is accessed by a number of stairs in different parts. In the north and east of the building are a number of mature trees.

Address/Location	Off Activity Road		Mount Isa	
Title Details / (GPS)	48RD148	Easting N/A	Northing N/A	
Place Category	Burial Ground			
Historical Context	<p>The Old Cemetery is the first cemetery for Mount Isa and was in use from 1926 to late 1929. There are seven early European settlers buried here, whose identity is confirmed. The stories of the people buried in the cemetery reflect the harsh living conditions in the early days of Mount Isa, with one death caused by a working accident at the mine, one due to a lack of medical attention and a third death being alcohol related. The setting in rugged bushland and the absence of headstones and grave ornaments evoke a sense of isolation and the harsh and simple life of the early European settlers.</p>			
Physical Description	<p>The Old Cemetery is located in bushland on the north fringe of Mount Isa bordering onto an industrial estate. Access to the site is approximately 0.5 km dirt track from Activity Road. The site is square shaped and fully fenced, with a stone wall and gate displaying the words OLD CEMETERY at the entrance. Adjacent is a watertank mounted on truck tyres. The site is covered in native grass and there are some native trees and shrubs. There are seven grave sites of varying sizes, laid-out with piles of local rocks. There are no grave ornaments or headstones. A metal plaque mounted on a rock near the entrance shows the inscription:</p> <p>ERECTED IN MEMORY OF THE PIONEERS BURIED IN MOUNT ISA'S ORIGINAL CEMETERY 1926 - 1929. HENRY TREANOR, DIED 7 NOVEMBER 1926, AGED 80 YEARS, JAMES CLANCY, DIED 15 JULY 1929, AGED 52 YEARS, FREDERICK GEORGE NEWTON, DIED 31 JULY 1929, AGED 20 YEARS, ALFRED JOHN MATHER, DIED 13 AUGUST 1929, AGED 3 MONTHS, JOSEPH EDWARD BIRD, DIED 29 AUGUST 1929, AGED 16 YEARS, WILLIAM THOMAS PAGE, DIED 20 SEPTEMBER 1929, AGED 53 YEARS, JOHN JAMES NOONAN, DIED 11 OCTOBER 1929, AGED 46 YEARS, A JOINT PROJECT OF MOUNT ISA CITY COUNCIL AND OF MOUNT ISA AND DISTRICT HISTORICAL SOCIETY, 1989.</p>
