## STATEMENT

This Revenue Statement details the methodology pertaining to the setting of Rate Levies, Fees, Charges and Measures that Council adopts to generate internally controlled revenue.

All Council officers are bound by the principles outlined in this policy in determining the level of rates, fees and charges, in the application of rebates and concessions relating to those fees, and in the recovery of overdue rates and charges.

## PURPOSE

The purpose of this Revenue Statement is:

- to enunciate the methods used to achieve Council's objectives set out in the Revenue Policy;
- to explain material matters that guide the development and implementation of revenue practices within the Council; and
- to comply in all respects with legislative requirements.

## LEGISLATIVE REQUIREMENTS FOR REVENUE STATEMENT

In outlining its Revenue Statement, the Council will adhere to specific legislative requirements for the content of the Revenue Statement as stated in Section 104 of the *Local Government Act 2009* and Section 172 of the *Local Government Regulation 2012*.

## ADMINISTRATION

Under Section 104 of the *Local Government Regulation 2012* Council may only levy rates and charges by the issuing of a rates notice.

A **rate notice** is a document stating—

- (a) the date when the rate notice is issued; and
- (b) the due date for payment of the rates or charges; and
- (c) the ways in which the rates or charges may be paid.

Council will issue one rate notice for the 2024/25 financial period. This notice will be issued on 01 August 2024. This notice will display 4 Quarterly Instalments, with the period that each quarter covers, the issue date of the quarterly instalment; the due date for the quarterly instalment; and the amount owing for that quarterly instalment.

The Quarterly Instalments, Periods Covered, Issue Date and Due Date for each instalment is as follows:

Supplementary Rate Notices or Water Consumption Notices for variations in rates and charges payable or unbilled amounts may be issued as required throughout the year.

## DIFFERENTIAL GENERAL RATES

The total amount to be raised by way of General Rates represents the balance of the funds needed to meet Council's budgeted expenditure for 2024/25, after taking into account all other internal and external revenue sources.

Differential general rates will be levied on all rateable land in the city council area. In Council's opinion, differential general rating enables there to be a more equitable relationship between revenue raised from particular land and the circumstances relevant to that land, than would be the case under a standard rating system where rates are levied at a single rate in the dollar on all rateable land. In determining its differential rating system, Council's objective is to ensure the fair and consistent application of lawful rating and charging principles, without bias, taking account of all relevant considerations and disregarding irrelevancies such as the perceived personal wealth of individual ratepayers or ratepayer classes.

In summary, the differential rating categories have been determined having regard to matters such as: -

- Land size and use;
- Availability of general services;
- Consumption of general services;
- State determined land valuation; and
- Income producing capacity of the land.

For a variety of reasons, including those provided for in Council's Revenue Policy, Council will levy Differential General Rates. The categories and descriptions, which the Council has identified for the purpose of differential rating, after consideration of relevant rating equity factors, are:

### DIFFERENTIAL GENERAL RATES AND MINIMUM GENERAL RATE

### OBJECTION TO DIFFERENTIAL GENERAL RATES CATEGORY

Owners of rateable land are informed that they have the right of objection to the category their land is included in. All objections must be made to the Mount Isa City Council Chief Executive Officer and the only basis for objection shall be that, at the date of issue of the rate notice, having regard to the criteria adopted by Council, the land should be in another category.

**All objections must be received in writing within 30 days after the date when the rates notice was issued. Any change to the rating category of the land is taken to have been changed from the start of the period of the rate notice (*Local Government Regulation 2012 section 91(5)*). Council will not adjust any rates or charges for any period prior to Council being formally notified in writing. The making of an objection, or the starting of an appeal, does not stop the levying and recovery of overdue rates on the land.**

## UTILITY CHARGES

Utility Charges have been calculated on the basis of Full Cost Pricing (FCP) pursuant to National Competition Policy (NCP) principles. The units applied to different types of properties have been established for many years and Council is generally satisfied that they reflect the relative costs of service.

## SEWERAGE CHARGES AND EFFLUENT CHARGES

The charging system for sewerage includes the following descriptions and definitions.

Charge Description	Definition
Sewerage Access Charge	Charge applied to each parcel of vacant land in the sewer area that has the potential to be connected to the sewer scheme, whether connected or not.
Sewerage Connected Charge	Charge applied to a single unit dwelling, each unit of a multi-unit dwelling or body corporate, each room in workers accommodation, each pedestal in a hospital, and the 1 <sup>st</sup> pedestal at all other connected allotments.
Sewerage Additional Pedestal Charge	This Charge is applied to each additional non-residential pedestal (including urinal cistern) that is connected to the sewer scheme after applicable Sewer Connected Charges.

## CLEANSING CHARGES

Mount Isa City Council Local Law No. 6 (Waste Management) 2018 4 Part 2 Waste Management Division 1 states that Council may:

- (a) designate areas within its local government area in which Council may conduct general waste or green waste collection; and
- (b) decide the frequency of general waste or green waste collection in the designated areas.

All residential properties within the serviced area will pay, as a minimum, for one Garbage Service.

This charge will be levied and recovered irrespective of whether occupiers within the serviced area avail themselves of the service and will apply irrespective of whether the premises are occupied for any period during the year.

This recognises that the cleansing provider is required to drive past each residence within the serviced area and it is impractical to monitor the use of the service on a dwelling-by-dwelling basis.

This also applies to a property with a business and a dwelling. As a minimum Council will levy one Garbage Service - Residential. Any commercial garbage service to the property will also, in addition, be levied to the ratepayer (where a commercial service is provided by Council or its appointed contractor).

The charging system for residential cleansing includes the following descriptions and definitions.

## RESIDENTIAL GARBAGE COLLECTION

Charge Description	Definition of service
Garbage Service ( <i>Mount Isa</i> )	Charge applied for the removal and disposal of one 240 litre (maximum) capacity refuse bin twice per week, or such other quantities as may be determined by Council, to a single dwelling, each unit of a multi-unit dwelling or Group title lots, and other installations as determined by Council.

Residential garbage service charges are levied per service (as defined in the table above) rendered to each Ratepayer. Each Service has an Australian dollar value equivalent and this is detailed below:

Utility	Mount Isa Rate per service	Camooweal Rate per service
Garbage Service	\$410.00	\$753.00

Residential households may apply for an additional bin service, but approval is at the sole discretion of Council. Each additional bin service will be charged at the rate per service as stated in the table above.

## WASTE MANAGEMENT AND RECYCLING CHARGE

In accordance with Section 94 (b) (ii) of the *Local Government Act 2009* and section 99 of the *Local Government Regulation 2012*, Council will make and levy a utility charge for the financial year 2024/25 on all assessments. This will be described as the Waste Management and Recycling Charge.

The Waste Management and Recycling Charge will allow Council to fund a range of strategic waste management initiatives including recycling across the region. The amount of the utility charge will be the rateable value of the land multiplied by 0.0007981, subject to no rateable assessment paying less than **\$29.00** per annum.

## WATER CHARGES

Pursuant to Part 7 of *Local Government Regulation 2012*, water charges shall be made and levied by the Council upon all lands and premises within the declared water areas for the supply of water services by the Council.

The basis and principles for making and levying of water charges will be -

- (i) an annual access charge, in advance, with half the annual access charge shown on each half yearly Rates Notice; which applies to all lands within the declared water areas; and
- (ii) a consumption charge for each kilolitre of water consumed; which shall be based on the consumption registered by the water meter or water meters installed by Council (or delegate) on the water service or water services to the land.

The charges are also made on the basis in respect of any land or other structure, building, individual

shop or place on land to which water is supplied, that is not rateable under the *Local Government Act 2009*.

Council operates two water schemes as follows:

- a) Properties in the City of Mount Isa who are supplied with treated water purchased from the Mount Isa Water Board; and
- b) Properties in the Town of Camooweal with water supplied from bores operated by Council.

Each water scheme has different costs for the supply and where applicable, the treatment of water, therefore the charges for the two schemes are different.

Council may levy utility charges for supplying a water service before the facility for supplying the service has been constructed if:

- (a) Council reasonably believes the service will be supplied in the financial year; and
- (b) Council:
  - (i) has started constructing the facility; or
  - (ii) intends to start constructing the facility during the financial year and has included the funds that are necessary for construction in its annual budget for the current financial year.

Water charges are levied on a user pays basis and set at a level to fully recover the cost of the purchase of water (where applicable), provision of infrastructure, and the operation, maintenance, and improvement of each system.

### Tenanted Properties

Council does not issue water consumption notices to tenants. All water charges will be issued to the property owner.

In the case of non-residential properties leased from the Council or any other non-residential leased property, a notice will be issued to person identified in the lease as requiring or requesting the service.

### Stopped Meter

Should a meter be found to have stopped, water consumption will be charged in accordance with the provisions of the Water Meter Policy.

### Dedicated Fire Service

A water service connection, irrespective of size, which services the fire-fighting systems only, will be levied at the rate applicable to a 25mm water service connection that would apply to the relevant property. This charge will only apply where there is no other meter connected to the property.

Should there be **more than 25kL** of water per annum used through the dedicated fire service meter; the property owner will be required to provide sufficient evidence to Council to prove water was used for genuine firefighting and fire system testing purposes. All water not used for genuine firefighting or fire systems testing will be charged to the property owner.

### *Conditions of Use for Dedicated Fire Services – fire system testing*

The owner of the service must maintain a register of all water used for fire system testing purposes. The register must show date of use, meter reading prior to use, meter reading following use, water

consumed, and where and why the water was used.

#### *Firefighting purposes*

The service will be deemed to be a multi-use connection and the charge will be in accordance with the Water Meter Service Size multiplier for a standard service, unless the owner of the service provides sufficient evidence to Council to support water was used for firefighting purposes. This might be in the form of photos, a report from the Queensland Fire and Emergency Services, a copy of an insurance claim, or a similar support document.

#### Dual Fire Service

A water service connection, irrespective of size, which services both the:

- a) fire-fighting systems; and
- b) normal water needs of the premises

will be levied at the rate that would apply to a 50mm water service connection. This charge will only apply where there is no other meter connected to the property.

If there is **only one water meter** on the property and it is a dual fire service meter, all water consumption will be charged unless the property owner can provide sufficient evidence to Council to prove all or some of the water was used for genuine firefighting and fire system testing purposes. All water not used for genuine firefighting or fire systems testing will be charged to the property owner.

#### *Conditions of Use for Dual Fire Services – fire system testing:*

The owner of the service must maintain a register of all water use for fire system testing purposes. The register must show date of use, meter reading prior to use, meter reading following use, water consumed, and where and why the water was used.

#### *Firefighting purposes*

The owner of the service must provide sufficient evidence to Council to support water was used for fire-fighting purposes. This might be in the form of photos, a report from the Queensland Fire Service, a copy of an insurance claim, or a similar support document.

If the service is used for any purpose other than firefighting or testing at any time, or the owner of the service fails to produce the register on demand, the service will be deemed to be a multi-use connection and the charge will be in accordance with the Water Meter Service Size multiplier for a standard service.

Once the review has been completed an officer will contact the ratepayer to advise of the outcome. All costs will be met by the property owner.

## WATER CONSUMPTION CHARGES

### Water Meter Readings:

Water meters for all properties in all water route groups, aside from groups 99 and 100 (generally Mount Isa residential and all of Camooweal) will be read on a half yearly basis. Water meters for all properties within water route groups 99 and 100 (generally Mount Isa non-residential properties) will be read on a quarterly basis.

Where a property has more than one water service connection, the first-tier water consumption limit will be applied to the **total** of all water consumed through all the water meters.

For example, if a Mount Isa single dwelling residential property has two water meters: meter one shows consumption of 100kL and meter two shows consumption of 1,700kL. The total consumption for the property assessment is 1,800kL. The property owner will be charged the Tier 1 consumption for the first 1,000kL and then Tier 2 consumption for the remaining 800kL of consumption.

For the purpose of this paragraph, the term 'water service connection' includes normal water service connections, dedicated fire service connections and dual fire service connections.

### Dedicated Fire Service

(i.e. A water service connection which services only the fire-fighting systems.)

A dedicated fire service water meter will be read however Council will abide by the *Water Supply (Safety & Reliability) Act 2008* in regard to charging for water used for genuine firefighting and fire system testing purposes.

### Dual Fire Service connection

(i.e. A water service connection which serves both:

- a) The fire-fighting reticulation system/s; and
- b) The normal water supply needs of the premises upon the land.)

A dual fire service water meter will be read however Council will abide by the *Water Supply (Safety & Reliability) Act 2008* in regard to charging for water used for genuine firefighting and fire system testing.

If the Dedicated Fire or Dual Fire service water connection is used for any purpose other than firefighting or fire-fighting systems testing at any time or the owner of the service fails to produce the register on demand, the service will be deemed to be a multi-use connection and all water consumption as registered through the water meter will be charged to the property owner.

**GENERAL INFORMATION****REBATES AND CONCESSIONS****Concession for Pensioners**

Council provides pensioners with a concession on General Rates and Utility Charges equivalent to that provided by the State Government, which is 20% of the amount levied to a maximum of \$200.00.

- No concession is provided on State Fire Services Levy as it is a State Government Charge.
- No concession is offered on any separate or special charges.

Council has increased the concession to pensioners in 2024/25 and will be providing an additional \$160.00 per annum or a total of up to \$360.00 per annum. Council has determined that pensioners as defined by the *Local Government Regulation 2012* are entitled to receive concessions on rates and charges levied by Council. Council may grant a concession for land that is owned by a pensioner under Section 120(1)(a) of the *Local Government Regulation 2012*.

In exercising these concession powers Council will be guided by the principles of:

- transparency by making clear the requirements necessary to receive concessions; and
- equity by ensuring that all applicants of the same type receive the same concession.

**General Eligibility**

Upon written application to Council, a pensioner may be eligible for a pension concession.

To be eligible under the Council Pension Subsidy Scheme for a remission of rates, the applicant must be an approved pensioner who meets **all** of the criteria below:

- is the sole owner, joint owner, part owner, or life tenant of a property;
- the property must be the principal place of residence of the pensioner or life tenant;
- has, either solely or jointly with a co-owner, the legal responsibility for the payment of rates and charges as defined herein, which are levied in respect of the said property by the Mount Isa City Council; and
- must be a current holder of one of the following cards:
  - Queensland 'Pensioner Concession Card' issued by Centrelink,
  - a Veterans' Affairs 'Gold Card'
  - a Veterans' Affairs Pensioner Concession Card
  - Repatriation Health Card for all conditions.

These cards do not qualify for a remission: Seniors Cards, Health Care Card, or Health Benefit cards.

In the case of life tenancy, the applicant must meet the above criteria and provide:

- a certified copy of the will, stating the applicant is a life tenant and responsible for paying rates **OR**
- a court order and a duly signed copy of death certificate.

Remissions can only be granted on one property per pensioner per half year.

**Concession for Owner occupied Residential Property with a larger than standard 20mm or 25mm water meter**

Council will grant a remission to all owner(s) occupied residential properties with a council installed water meter larger than the standard 20mm or 25mm water meter subject to the following criteria.

**Conditions for Receiving Remission**

Property is to be owner occupied and used for residential purposes only, no business (other than a home-based business) is carried out on the premises.

Home based businesses must be a conforming home business under the City of Mount Isa Planning Scheme 2006 (as amended 2015) by complying with all Acceptable Solutions of the residential planning area code & the home business code; and

the property must be classified in one of the following differential rating categories:

- 1 – Residential <1Ha – Camooweal
- 2 – Residential <4,000 m<sup>2</sup>
- 4 – Residential <1Ha; and

The property must only have one council installed water meter and that water meter must be 32mm or larger, and

If the property has multiple water meters, one of which is 32mm or larger and one of which is less than 32mm e.g., a 25mm water meter. Under council's Revenue Statement, the landowner is required to pay for the larger meter. In this example, the access charge will be based on the 25mm water meter as it is the larger of the 20mm and 25mm water meter; and

The property cannot currently be subject to any other Council approved concessions or remission for water access charges.

The property owner will remain eligible to apply for a concession or remission on water consumption charges so long as they meet all the relevant criteria as set out in Council's Water Charges Remission Policy.

**Remission Available**

All ratepayers who are eligible for this remission will be charged an annual water access charge equivalent to that of a 20mm water meter.

Council is satisfied that such circumstances justify the exercise of the remissions power and grants this remission on the basis that to require the ratepayer to pay full charges in these circumstances would result in hardship.

**Home Haemodialysis (Kidney Dialysis) Treatment**
